-- Abstract --

Please delete the following paragraph beginning on page 8, line 23 of the substitute specification (page 30, line 23 of the Office Action Response dated January 17, 2003) :

-- A tension member comprising a plurality of fiber filaments (21) gathered into a plurality of strands (20). The filaments (21) run close together, and a protective sheath (16) is provided around the strands. Each strand (20) is coated on the exterior thereof with a sheath (22) of a material having a low friction coefficient, permitting the strands (20) to move longitudinally in relation to one another and independently of each other. --
